The International Elbow Working Group

The International Elbow Working Group [IEWG] was founded in 1989 by a small group of canine elbow experts from the USA and Europe to provide for dissemination of elbow information and to develop for screening that would be acceptable to the international scientific community and breeders.

The annual meeting is organised for the purpose of exchanging information and reviewing the IEWG protocol. All interested persons are invited to attend the meeting and to participate in its activities.

The IEWG acknowledges Hill's Pet Nutrition for their support in organising the annual IEWG meeting.

The IEWG is an affiliate of the WSAVA.

Posters for the poster session and free communications can be admitted till July 20 2008, to dr. Herman Hazewinkel [H.A.W.Hazewinkel@uu.nl].

X-rays of participant's own patients are welcomed for evaluation or discussion.

For general information please contact dr. Thijs How [how@wxs.nl].
